SMOKING BIN – WALL–MOUNTED – BLACK

Perfect for outside workplaces, shops, pubs, restaurants and public spaces, the wall–mounted smoking bin has a sleek black design that is bound to complement your premises. Encouraging smokers to responsibly dispose of their cigarette ends, it features a stubbing plate to ensure cigarettes are completely out and has a design which reduces airflow to prevent fires.

With a lockable door, this allows only authorised people to open this up to facilitate cleaning to prevent tampering and features a removeable liner which means you can simply tip out the contents and return for hands–free emptying. With four screw mounting holes, this can be surface mounted to any wall using the fixings supplied as standard.

Manufactured for Vigil Products of galvanised steel, the internal liner and stubbing plate are made from stainless steel, which together create a stylish look. Measuring 320mm x 260mm x 82mm, the wall–mounting smoking bin is the perfect ashtray to provide for staff and visitors to aid in the fight against litter and environmental contamination.

Pair your cigarette bin with a clear smoking area sign to effectively designate smoking areas and encourage responsible disposal of cigarette butts.
