## RUBBER CORNER GUARD

---

The solid rubber corner guard is made of a durable rubber which absorbs and deflects impacts and has a reflective yellow and black finish to increase visibility. The hazard warning is ideal for warehouses and factories where forklifts and lorries are operating to prevent an accident and reduce the damage it could cause. Also used in car parks and the corner buildings on the roadside, the six pre-drilled holes make it simple to install where needed.

Designed specifically to provide wall protection, the recycled rubber design lessens the impact of a collision while warning drivers of a hazard or obstacle before it's too late. A long-lasting solution for protecting corners indoors and outdoors, the black and yellow colour combination ensures the corner guard also complies with EU directive EC92/58 and is made of recycled rubber. Our rounded-edged version provides extra impact protection.

Product	Rubber Corner Guard
Product Code	VP-RCG-S
H x W x D	100x135x805 mm
Weight	2.24kg
Colour	Yellow and Black
Installation	Indoor and outdoor
Carton Quantity	10
Carton Weight	21.58kg
Carton Dimensions	239x130x810mm
